NOTES

1. The data is current as at August 2017.
2. The data has been rounded to the nearest per cent and therefore some categories will not total 100%.
3. The data is derived from information provided by individuals. 100 per cent of individuals are represented in the age and gender data. The other categories are based on responses from individuals received through the diversity questionnaire, given to members of the firm in accordance with the SRA requirements.
